

Ancoats, Bradford & Clayton Integrated Neighbourhood Team.

Our plan on a page 2021-2022.

About our neighbourhood

GPs report that issues common in the area are related to obesity and mental health

There are over 17,200 households in this neighbourhood

An area of mixed affluence that is home to a many diverse communities

Digital connectivity is low here with access to devices, skills and limited motivations all contributory factors

Whilst the range of larger community organisations we have may be limited, the impact they have is significant

Our neighbourhood includes Ancoats and Beswick, and Clayton and Openshaw located in the North East of Manchester. We lie on the edge of the City Centre, with Ancoats and New Islington seeing significant investment in new places to live, work and be active. In Beswick the Etihad campus and Velodrome have brought world class sporting facilities to our neighbourhood, in Clayton we have abundant green spaces and up to Openshaw at the boarder of Tameside we have a vibrant range of community shops.

How this plan was put together

This plan has been developed by the Ancoats, Bradford and Clayton Neighbourhood Leadership Team and builds on the 2019/20 Neighbourhood Plan and draft 2020/21 which was never fully realised due to the COVID-19 pandemic. Demands on core services have been significant throughout the pandemic, however as an integrated team who are co-located we have benefited from greater interactions and partnership working across community health and social care, with the need to build on this to achieve further benefits for the people we are supporting.

Our priorities

The key things we are doing in our neighbourhood this year to improve health and wellbeing, as well as tackle health inequalities:

We will continue delivering and designing services in partnership with local people and partners through a neighbourhood infrastructure . An infrastructure that can be forward planning and reflective, as well as stepping up to meet urgent and immediate needs where and when these may arise.

We will maximise COVID vaccination uptake, ensuring we continue the work undertaken with our local Voluntary, Community and Social Enterprise sector organisations to ensure we reach as many people as possible across our diverse community.

We will strengthen digital inclusion in our neighbourhood by improving device access, expanding skills and training opportunities, providing more local opportunities for people to engage with community assets online, using accessible health and care resources.

We will implement the Citywide healthy weight strategy in partnership with service providers and organisations. Making the most of collaborative work to support our developing food pantries, community grocers, community cafes and increasing low level physical activity with local people.

We will be developing and embedding a strengths based approach across neighbourhood services, GPs and Adult Social Care.

We will develop a key role in influencing mental health community transformation, implementing Mental Health First Aiders across the community, recognise the impact of adverse childhood experiences, whilst supported by a range of community partners.

Powered by:

We're also working on a number of citywide priorities that will benefit the neighbourhood

1 Support the development and roll-out of Population Health Management

2 Collaborate with children's services and build a 'Think Family' approach into the model

3 Further integrate adult social care and support for care homes

4 Align Integrated Neighbourhood Teams, Primary Care Network workforce and organisation development Plans

5 Embed the MLCO Executive lead role in each neighbourhood

These are areas of work that are taking place across the city in all 12 of our neighbourhoods.

What your Integrated Neighbourhood Team does

Manchester Local Care Organisation is a pioneering public sector organisation that has brought together and provides your NHS community health services and adult social care services in Manchester. We are part of both the NHS and the local authority.

We take a neighbourhood approach to care as we understand that people require care as close to home as possible. We want to provide the best care right across the city, but we also know that local areas have different requirements.

Our approach is based on dividing Manchester into 12 neighbourhoods and tailoring care to local needs. In a practical way, that means our health care teams (such as district nursing teams) and social care teams are based in buildings together. Care can be planned and delivered in a seamless way with teams taking a joint approach around individuals, working closely with local GPs. It's an approach based on international best practice that we've adopted in Manchester.

As well as providing these core day to day services, the Integrated Neighbourhood Team have a role in working with local people and partners. They build links with other partners in their neighbourhood – from Manchester City Council neighbourhood teams, local housing associations, police and voluntary organisations - so everyone is working together around the needs of the neighbourhood.

How we've worked to improve health and wellbeing

A neighbourhood digital inclusion collaborative group comes together regularly to connect, share ideas and take forward initiatives. Exciting developments are taking place right across the area, including new opportunities to learn skills, get involved with on line activities and access health and wellbeing support.

Partnership walks area a regular feature of the ways of working in the neighbourhood, with an open invitation to anyone who lives and works in the area with an interest in the health and wellbeing of our communities to come along.
